**Welcome...**

Shaping the future of your energy network

# Moving to a Distribution System Operator

- Welcome to this collaboration event - Electricity North West working together with Carbon Co-op
- Electricity North West recognises the need to make wide ranging changes
  - To meet the region's changing energy needs
  - To play our part in delivering it's low carbon ambitions
- Many of the changes will be driven by the new role of Distribution System Operator and the services it will provide
  - This is being developed through a UK wide consultation process
- Today is about sharing our thoughts and listening to North West stakeholders
  - We'll tailor our approach to our region's priorities
- This is your opportunity to influence and shape our thinking
- We'll be publishing our plan early in the new year

# Moving to a Distribution System Operator

Welcome (Peter Emery)

ENW's view of Distribution System Operator

**Community View**  
Jonathan Atkinson

**Local Authority View**  
Mark Atherton

**Policy View**  
Jonny Gowdy

**Energy sector view**  
Randolph Brazier

BREAK

Risks and Opportunities – Panel Discussion

**Endeco Tech**  
Wayne Muncaster

**United Utilities**  
Steve Slavin

**Upside Energy**  
Graham Oakes

**Iggesund**  
David Messenger

**Energy Enterprise**  
Nigel Holden

LUNCH

Risks and Opportunities – Table Discussions
